

PROVIDER PRODUCT OF THE MONTH

NEOCUTIS LUMIERE EYE CREAM

What is it?

NEOCUTIS Lumiere eye cream is a restorative eye cream containing PSP (processed skin cell proteins), caffeine, hyaluronic acid and bisabolol. PSP is a proprietary skin care ingredient that provides complete and balanced combination of growth factors and cytokines to help restore a smoother, softer and more vibrant tone and texture to the skin.

What does it do?

Smooths the appearance of fine lines and wrinkles

Firms and hydrates the skin

Reduces puffiness and under eye darkness

NEOCUTIS LUMIERE EYE CREAM

Why I love it?

This cream has been a life saver since having my twin boys! Even with little sleep, this cream has reduced my under eye puffiness and dark circles. Within just a few uses, I could already tell a significant difference. This has stayed in my daily routine and I highly recommend it!
