

PROVIDER PRODUCT OF THE MONTH

COLORSCIENCE WHIPPED FOUNDATION

What is it?

Colorscience whipped foundation is a sheer water resistant sunscreen that also serves as a foundation. Allowing you to cover minor skin imperfections while also providing protection against the sun.

Who should use it?

It is great for all skin types making it a great option for anyone. Providing just the right amount of moisture and protection against the sun.

Why I love it

It is very light which makes it a great option for anyone that suffers from oily skin. It also contains zinc oxide sunscreen which I strongly recommend. It is nutrient infused and feels like your bare skin.
