

# PROVIDER PRODUCT OF THE MONTH

## NEO CUTIS BIO CREAM

### What is it?

It's an incredible moisturizer that's fantastic for all skin types, especially for dry and sensitive skin. It has features such as glycerin to help moisturize the face and anti-aging benefits.

### Why do I love it?

I love it because it does not have any added scent, which makes it fantastic for sensitive skin. There are also added benefits to help nourish the skin and prevent early signs of aging. It has an "airless pump" which is great, because it helps to ensure that you are getting every last bit of product in the bottle! It makes moisturizing the face easy to incorporate into a healthy skincare routine.
